6th February 2017

Dear Sir or Madam;

www.havering.gov.uk

**COLLIER ROW ROAD BY RAMSDEN DRIVE ACCIDENT REDUCTION PROGRAMME
– PROPOSED PEDESTRIAN REFUGE**

The pedestrian refuge is proposed to minimise accidents along Collier Row Road by Ramsden Drive. There have been a total of seven personal injury accidents in the vicinity of the above location over a five year period. Of this total, two were serious and two involved pedestrians.

The Government and Transport for London have set targets for 2020 to reduce Killed or Serious injury accidents (KSI) by 40%; Child KSIs by 50%; pedestrian and cyclist KSI's by 50% from the baseline of the average number of casualties for 2005-09. The above proposals will help to meet these targets.

Before a decision is made on implementing these proposals, you have the opportunity to comment, which should be in writing to;

The Principal Engineer,
Environment,
Engineering Services,
Town Hall,
Main Road,
Romford RM1 3BB.

or by email to highways@havering.gov.uk

Plans showing the proposals are enclosed and also available to view on the Council's web site, a link of which is shown below;

<https://www.havering.gov.uk/Consultations>

Comments should reach us by 24th of February 2017.

If you have any questions, please do not hesitate in contacting our project engineer, Mr Siva Velup on 01708 433142.

Please note that all comments we receive are open to public inspection.

The decision on the scheme will be made through our Highways Advisory Committee process. The responses to this consultation will be discussed at the committee's meeting on 07th of March 2017 at 7:30pm in Havering Town Hall, Main Road, Romford.

The agenda for the meeting, which will include the officer's report, will be available at the meeting and also on the Council and Democracy pages of the Council's website prior to the meeting.

The committee is open to the public and the Council's Constitution allows one person to speak in support and one person to speak in objection to the proposals.

Each person will have up to a maximum of 3 minutes to speak. You must pre-register to speak on a 'first come first served basis' so if you are not the first person to register it is unlikely you will be able to speak to the committee. If you wish to register to speak to the committee please contact Taiwo Adeoye on 01708 433079 no earlier than 28th February 2017 and at least two days prior to the meeting.

The committee will seek to review all of the issues connected with the proposals and make a recommendation to the Cabinet Member for Environment, Regulatory Services and Community Safety, who will make the final decision on the scheme. There are usually a number of schemes to be discussed by the committee and it may be late in the evening before the scheme is considered.

Yours faithfully,

Mark Philpotts CEng MICE FCIHT FIHE PIEMA
Principal Engineer
Engineering Services

HIGHWAYS ADVISORY COMMITTEE

7 March 2017

People will be safe, in their homes and in the community	<input checked="" type="checkbox"/>
Residents will be proud to live in Havering	<input type="checkbox"/>

SUMMARY

Collier Row Road – Accident Reduction Programme was one of the schemes approved by Transport for London for funding. A feasibility study has recently been carried out to identify safety improvements and pedestrian refuge is proposed to minimise accidents. A public consultation has been carried out and this report details the finding of the feasibility study, public consultation and recommends that the above proposals be approved.

The scheme is within **Mawney** ward.

RECOMMENDATIONS

1. That the Committee having considered the representations and information set out in this report recommends to the Cabinet Member for Environment, Regulatory Services and Community Safety that the pedestrian refuge along Collier Row Road by Ramsden Drive as shown on the drawing No. QP004-5 be implemented.
2. That, it be noted that the estimated costs of £14,000, can be met from the Transport for London's (TfL) 2016/17 Local Implementation Plan allocation for Accident Reduction Programme.

REPORT DETAIL

1.0 Background

- 1.1 In October 2015, Transport for London approved funding for a number of Accident Reduction Programmes as part of 2016/17 Havering Local Implementation Plan settlement. Collier Row Road Accident Reduction Programme was one of the schemes approved by TfL. A feasibility study has been carried out to identify accident remedial measures in the area. The feasibility study looked at ways of reducing accidents and recommended safety improvements. Following completion of the study, the safety improvements, as set out in this report, are recommended for implementation as they will improve road safety.
- 1.2 The Government and Transport for London have set targets for 2020 to reduce Killed or Serious injury accidents (KSI) by 40%; Child KSIs by 50%; pedestrian and cyclist KSI's by 50% from the baseline of the average number of casualties for 2005-09. The Collier Row Road Accident Reduction Programme will help to meet these targets.

Accidents

- 1.3 In the five-year period to July 2016, there have been a total of seven personal injury accidents in the vicinity of the above location. Of this total, two were serious; two involved pedestrians and four occurred during the hours of darkness.

Proposals

- 1.4 The pedestrian refuge is proposed along Collier Row Road by Ramsden Drive as shown on drawing no. QP004-5 to minimise accidents in the vicinity.

2.0 Outcome of public consultation

- 2.1 Letters, describing the proposals were delivered to local residents / occupiers. Approximately, 60 letters were delivered by hand to the area affected by the proposals. Emergency Services, bus companies, local Members and cycling representatives were also consulted on the proposals. Three written responses were received from Local Members (2) and Havering Cyclists. The Local Members are in favour of the scheme. The Havering Cyclists queried whether the pedestrian refuge proposal makes the crossing more safer at this location.

3.0 Staff comments and conclusions

- 3.1 The accident analysis indicated that seven personal injury accidents (PIAs) occurred in the study area. Of these seven PIAs, two were serious; two involved pedestrians and four occurred during the hours of darkness.
- 3.2 The proposed pedestrian refuge would minimise accidents at this location. It is therefore recommended that the proposed safety improvements for Collier Row Road in the recommendation should be recommended for implementation.

IMPLICATIONS AND RISKS

Financial implications and risks:

This report is asking HAC to recommend to the Cabinet Member whether or not the scheme should proceed.

Should the Committee recommend the scheme proceeds the estimated cost of £14,000 for implementation will be met from the Transport for London's (TfL) 2016/17 Local Implementation Plan allocation for Accident Reduction Programme.

The costs shown are an estimate and are part of the full costs for the scheme, should all proposals be implemented. It should be noted that subject to the recommendations of the committee a final decision then would be made by the Lead Member – as regards to actual implementation and scheme detail. Therefore, final costs are subject to change.

This is a standard project for Street Management and there is no expectation that the works cannot be contained within the cost estimate. There is an element of contingency built into the financial estimate. In the unlikely event of an overspend, the balance would need to be contained within the overall Street Management Capital budget.

Legal implications and risks:

The Council's power to construct and maintain places of refuge for the protection of pedestrians in the maintained highway is set out in Part V of the Highways Act 1980 ("HA 1980").

Human Resources implications and risks:

None.

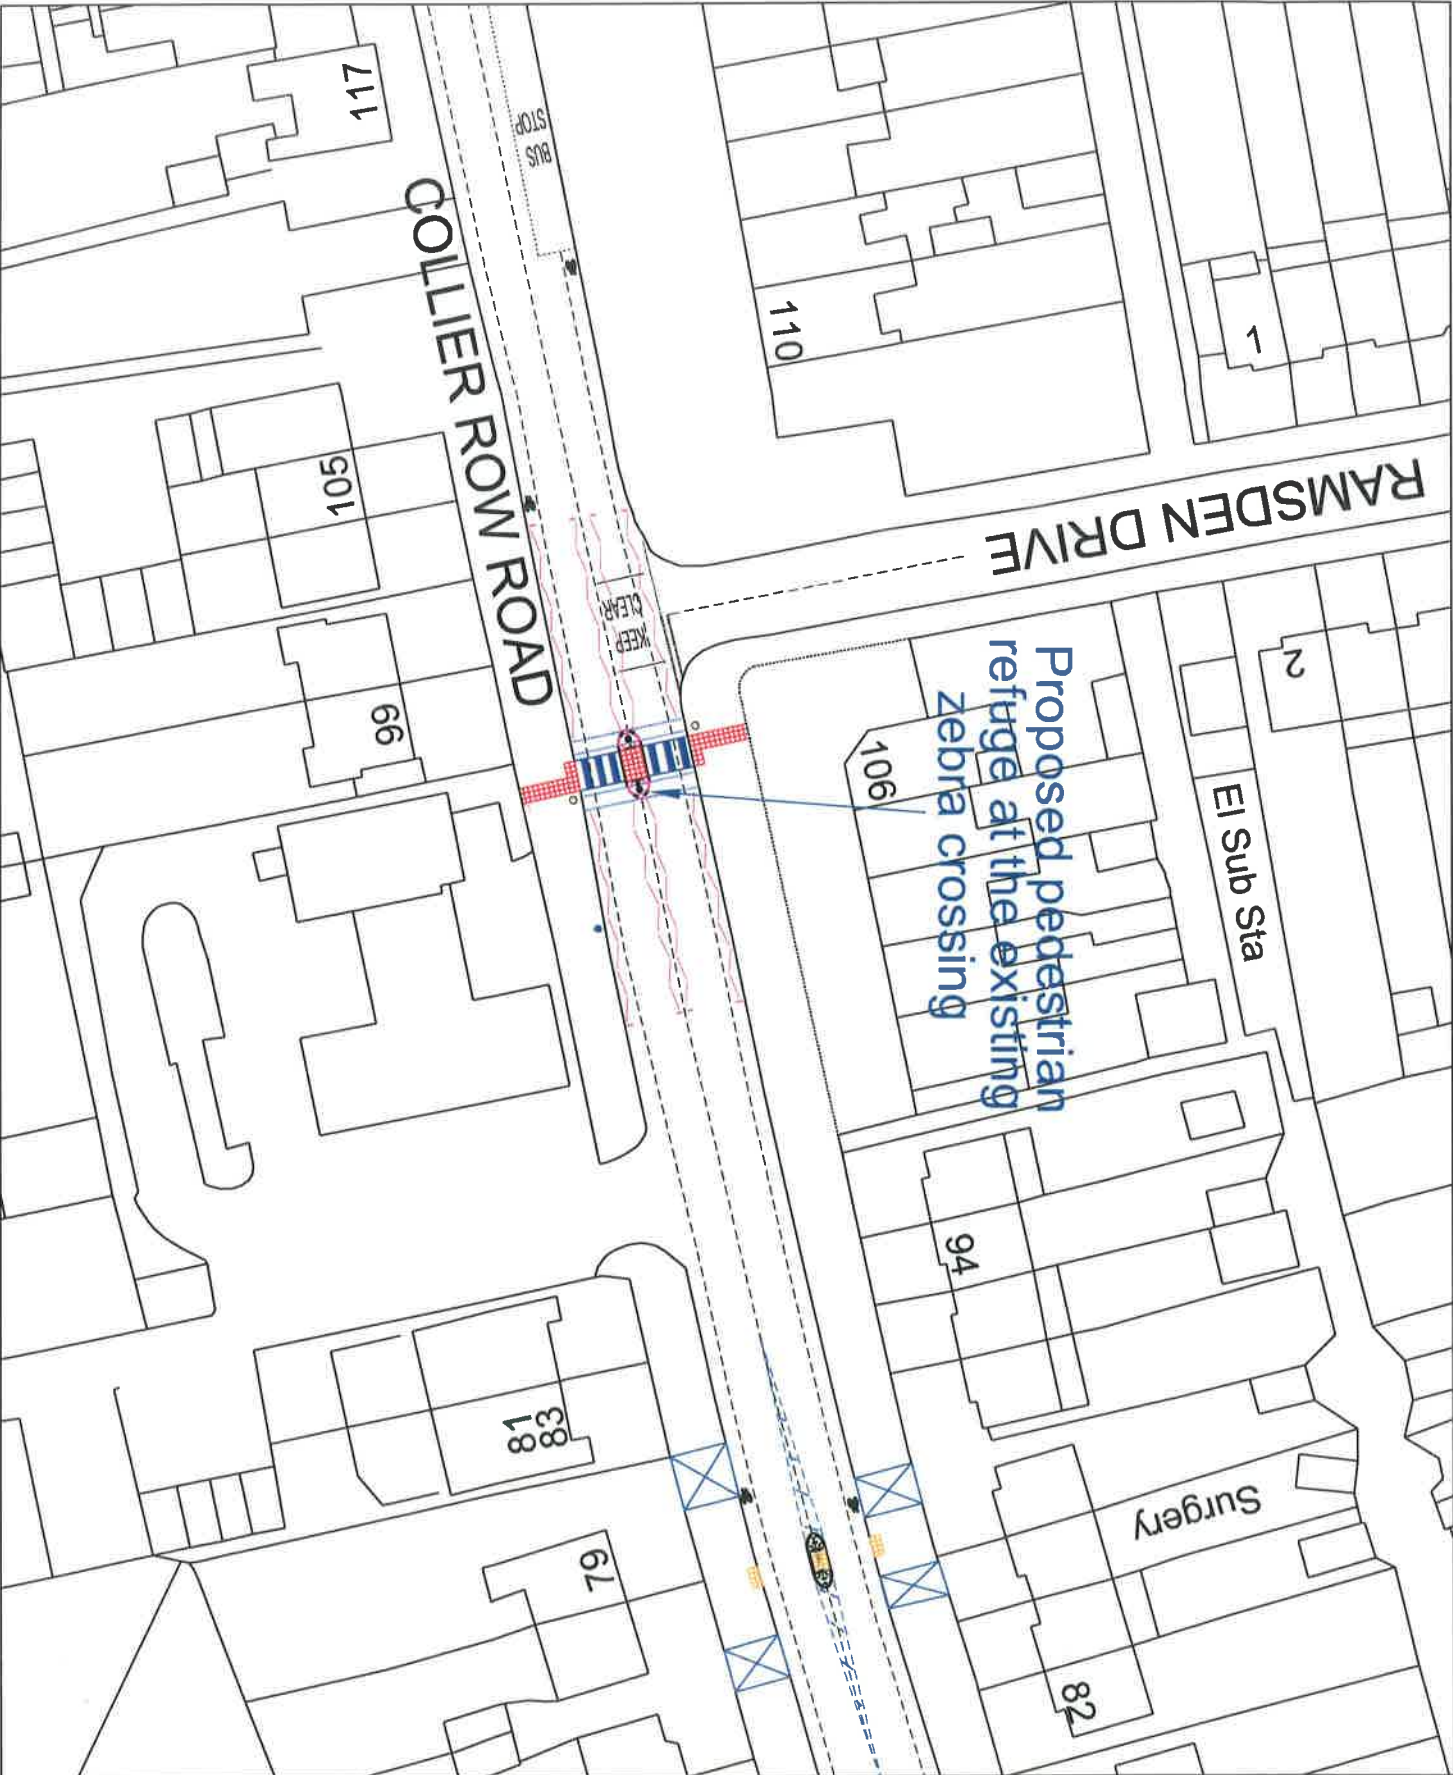

Equalities Implications and Risks:

The Council has a general duty under the Equality Act 2010 to ensure that its highway network is accessible to all users. Where infrastructure is provided or substantially upgraded, reasonable adjustments should be made to improve access. In considering the impacts and making improvements for people with protected characteristics (mainly, but not limited to disabled people, the young and older people), this will assist the Council in meeting its duty under the Act.

There would be some visual impact from the proposals; however these proposals would generally improve safety for both pedestrians and vehicles.
