

## HEALTH & WELLBEING BOARD

**Subject Heading:** Update on Referral to Treatment (RTT) Delays

**Board Lead:**

**Report Author and contact details:** Jon Scott (PA LeeAnn Hamilton 01708 435039) and Louise Mitchell

**The subject matter of this report deals with the following themes of the Health and Wellbeing Strategy**

- Theme 1: Primary prevention to promote and protect the health of the community and reduce health inequalities
- Theme 2: Working together to identify those at risk and intervene early to improve outcomes and reduce demand on more expensive services later on
- Theme 3: Provide the right health and social care/advice in the right place at the right time
- Theme 4: Quality of services and user experience

### SUMMARY

Significant issues were identified with how Barking, Havering and Redbridge University Hospitals NHS Trust (BHRUT) had historically reported Referral to Treatment (RTT). We suspended reporting of the RTT standard in 2014 so that we could fully investigate the issues and create a robust and comprehensive recovery plan. Since the RTT issues were identified in 2014 we have been working to recover our RTT position and implement our Recovery and Improvement Plan.

We are pleased to announce that in June 2017 we met the national RTT incomplete standard of 92% (of our patients waiting less than 18 weeks) with performance of 92.2%. Our unvalidated data for July 2017 indicates we have maintained this performance for a second month.

As of the end of June 2017, we were 4.7% ahead of our recovery trajectory to deliver the RTT national standard by the end of Sept 2017. We have treated 1,556

more patients than anticipated. In April 2014 we had just over 1,000 patients who had waited more than a year for their treatment. At the end of July 2017 we reported 11 patients had waited more than a year for their treatment, with a number of these patients choosing to wait longer following our offers to treat them sooner.

## **RECOMMENDATIONS**

- To note that BHRUT has delivered the national RTT incomplete standard for June 17 (July data is not yet published nationally, but unvalidated data suggests we have achieved the standard for a second month).
- To note progress of RTT activity and the reduction in long waiting patients
- To note progress with the clinical harm reviews of patients who have waited a long time for their treatment
- To note the work and support we have given with the development of a system-wide RTT recovery plan in response to the legal directions placed on NHS Havering Clinical Commissioning Group by NHS England which came into force on 20 June 2016.

## **REPORT DETAIL**

---

In December 2013, the Trust migrated from Total Care Patient Administration System (PAS), to Medway PAS. This change in information system for the management of patient waiting lists, whilst large and complex, should not have affected performance. However, the migration exposed a discrepancy between current performance and historical performance and suggested that we were not compliant with Referral To Treatment (RTT) standards, as was previously thought. A reporting break was agreed in February 2014 to give us time to investigate.

In light of the issues identified, we undertook an investigation into the matter in August 2014, which concluded that there are five main reasons for the decline in performance following the deployment of Medway:

1. RTT performance was not calculated correctly
2. Our governance processes for reporting and oversight were weak
3. Demand and capacity were not aligned
4. Data quality was poor
5. Training and organisational awareness of RTT and its rules were limited.

## **Health and Wellbeing Board**

Since the RTT issues were identified in 2014, we have been working to recover our RTT position as captured in this Recovery and Improvement Plan.

### **Current RTT Position**

There is dedicated Project Management Office support for RTT across the whole health system and there are a number of work streams in motion to support the delivery of the recovery plan for RTT:

1. Operational management
2. Outsourcing
3. Demand and capacity analysis
4. RTT administration and governance
5. Validation and data quality
6. Theatre productivity
7. Clinical harm reviews
8. GP Planned Care Quality Improvement Programme

### **Clinical Harm Reviews**

A key element of the RTT Recovery Plan is the Clinical Harm Programme. The programme is designed to ensure risk to patients waiting longer than the NHS constitutional standards for their treatment are appropriately and efficiently managed. Patients are reviewed, and the findings reported weekly via Access Board and the Clinical Harm Review Panel.

#### **Phase 1**

- Focused on patients on admitted pathway
- More than 900 reviews carried out
- No moderate or severe harm identified.

#### **Phase 2**

- Focused on patients on non-admitted pathway
- More than 3,500 reviews carried out
- No moderate or severe harm identified

#### **Phase 3**

- Commenced 1 October 2016
- Focused on patients who would have been waiting more than 52 weeks before 3 December 2016
- All 83 patients have been reviewed and no moderate or severe harm identified

#### **Phase 4**

- Commence 5 December 2016
- Focused on a random sample of 10% of undated patients with a 35 week breach date between 4 December and 13 March 2017
- 206 patients have been reviewed with no harm found.

**Phase 5**

- Commenced 15th March 2017
- Focused on non-admitted patients who have been waiting between 30 and 40 weeks
- 225 patients in this cohort, a random sample of 10% of patients (23 in total) have been reviewed with no harm found.

**GP Planned Care Quality Improvement Programme**

We continue to work closely together at a system level with BHRUT to manage referral activity inflow to the Trust whilst enhancing the patient pathway at a specialty level. This is clinically led work and includes priority areas such as Gastroenterology, Musculoskeletal (MSK) and Dermatology pathways.

**Patients who have waited a long time for treatment (52 weeks plus)**

We have a small number of patients who are now waiting over 52 weeks for treatment. These are patients who have;

- chosen to postpone their treatment for personal reasons having been offered reasonable choice
- not responded to three letters, contact via their GP asking them to arrange an appointment
- not attended two consecutive appointments or are on a complex care pathway

**RTT recovery plan in response to legal directions**

In response to the legal directions issued by NHS England in June 2016 to Havering CCG, (Lead CCG for BHRUT contract) we developed a robust and credible recovery plan, including a robust demand and capacity plan for each specialist area, which would allow us to return to delivering the RTT standards.

Based upon the specialty modelling and plans, the expectation was to deliver the national 92% RTT incomplete standard by the end of September 2017. We have delivered this plan three months ahead of schedule by meeting the 92% standard in June 17.

In June 2017 we met the national RTT incomplete standard of 92% with performance of 92.2% of our patients waiting less than 18 weeks. As of the end of June 2017, we were 4.7% ahead of our recovery trajectory to deliver the RTT national standard by the end of Sept 2017. We have treated 1,556 more patients

## **Health and Wellbeing Board**

than anticipated. July performance and data has been submitted to NHS England but will not be published until mid-Sept 17.

NHS England is now fully assured that all requirements, as set out in the original Directions, have been satisfied. This is the result of focused work to deliver our plan, plus subsequent system performance. The Legal Directions against Havering CCG concerning RTT have now been lifted (Feb 2017).

There was a significant challenge to return to meeting the RTT standards and there remains an equally challenging one to sustain performance, which has involved undertaking a significant amount of extra operations (5,000) and outpatient appointments (95,000) over a 18-month period. The whole system has worked hard to tackle the challenge.

### **On-going assurance**

A Governance and Assurance Framework has been developed with a clear reporting line and for governance. RTT assurance and governance will be managed through the Planned Care Programme Board.

External assurance is also provided through meetings with NHSE and NHSI. The Trust also has a weekly Access Board that feeds into the Planned Care Programme Board. This is chaired by the Deputy Chief Operating Officer. There is also an External Clinical Harm Panel chaired by NHS England.
