Services

PEOPLE OVERVIEW & SCRUTINY SUB-COMMITTEE

Subject Heading: Provision for Autism Support Barbara Nicholls, Strategic Director of People SLT Lead: Report Author and contact details: Sophie Barron, Commissioner & Project Manager. T: 01708 431082 E: Sophie.Barron@havering.gov.uk Delivering Integrated services and working in **Policy context:** partnerships to achieve improved outcomes and value for money services for residents Financial summary: The current contract is £80k annually, and is an offer for adults 18+. The funding is cost neutral to the Council as it recommended to recommission an alternate service that meets current needs that can deliver the priorities in the Council's All Age Autism Strategy.

The subject matter of this report deals with the following Council Objectives

People - Things that matter for residents x

Place - A great place to live, work and enjoy

Resources - A well run Council that delivers for People and Place.

SUMMARY

The current contract with Sycamore Trust started in February 2018, and was extended again in 2021 due to a failed procurement cycle. At that time, no bid was qualified for the Autism 'lot' however in order to ensure continuity of service during the pandemic period, it was considered in the best of interests of users of the service and the council. Due to the current contracts approaching end date of the 31st January 2024 and difficulty in securing

additional funding, officers were preparing to give Sycamore Trust notice. However, the need for a final decision became urgent due to the need for Sycamore Trust to give three months' notice on their current lease. The Council confirmed on the 9th October 2023 that its intention was the contract would be allowed to lapse on 31st January 2024. It was and is intended that engagement with people with Autism, their families and communities is undertaken to plan with our residents the new service offer after the contract has ended. However it is recognised that there is now a risk of a gap in service for our vulnerable residents with Autism and their families, so it is proposed to extend the service for a further six months, to enable further time to work with people who use the current service around the future proposed model. It is of note that the service as currently commissioned, is an offer for those aged 18+, and in order to meet the aims of the All-Age Autism Strategy, a different service offer needs to be developed and commissioned.

RECOMMENDATIONS

It is recommended that People Subcommittee

- Notes the proposal to extend the current arrangement with the Sycamore Trust for 6 months (from 1st February 2024) whilst carrying out a review of services and ensure a new service model that is aligned to other available services (particularly the new and expanding service provided by North East London Foundation NHS Trust)
- Notes that the Sycamore Trust asked the Council to make its intentions clear by October 2023 due to the need for a three-month break clause in their current lease for premises
- Notes that to coincide with this review, it is proposed that the Council will engage with the autistic community to gain further insight on what the current needs are, providing the Council with an opportunity to map services across partner organisations to establish gaps and avoid any duplication. It is our intention to use this information to help determine and shape a service that meets the current needs of residents with Autism, their families and communities.
- Consider asking officers to return to this Sub committee in late Spring 2024 with an update.

REPORT DETAIL

- 1. Havering currently commissions the Sycamore Trust to deliver a preventative offer for Adults with Autism and related conditions only, at a cost of £80,000.00 per annum. The current contract ends on the 31st January 2024.
- 2. The current provider has delivered this service since 2018. In 2021 a procurement exercise was completed but the procurement cycle failed due to no suitable bids being received. As a result of this, an extension was awarded to the Sycamore

Trust as an interim measure from 1st February 2021 to ensure continuity of service for users of the service, due to the COVID-19 pandemic, and was considered in the best interests of the council.

- 3. Throughout 2023, various options have been explored to secure additional investment to expand the adult service to an all-age offering to deliver on our 'All Age Autism Strategy', agreed by Cabinet in August 2022. It is now understood the Sycamore Trust do deliver an all age offer from the hub but by utilising funding from other Local Authorities. There is currently no peer support and social inclusion offer for Havering Children with Autism other than signposting and advice and a Parent Support Group. Unfortunately, despite exploring various funding streams it has not been possible with the current budget pressures impacting Havering and our Health partners, to secure any additional funding. This means completely redesigning the service offer to maximise the impact of the council funding of £80k.
- 4. With the launch of the all-age strategy and the development and expansion of NELFT's Autism Diagnostic pathways earlier in 2023, the current service specification is no longer fit for purpose. In addition, there have been some service delivery-related issues with the commissioned provider, i.e. low numbers of new referrals when now compared to the numbers coming through the new NELFT diagnostic pathways; and a large spend on rental costs. The service currently supports 3.1% of Havering's predicted adult autism community which supports that a review of current autism services is required.
- 5. The Council is also aware that there is increased demand for support for parents of children with autism due to a large demographic shift of children with additional needs moving into the borough which is detailed in the 2021 School Census. There has also been an increase in requests for peer support for those over 30, which is currently not delivered within the current contract.
- 6. Whilst exploring the decision to let the contract lapse at its end date, the Council was asked by the provider to decide on the future of the contract due to a break clause in their rental agreement of just over three months. They needed to give notice to their landlord by mid-October to avoid any financial difficulty caused by extending the lease post the expiration of the contract.
- 7. Given the need to consider whether the current service is delivering best value for the residents and the council, and the need to consider how the Council's resources could best deliver against the priorities of the All Age Strategy 2022, and given that this contract was coming to a natural end in any event, officers recommended to the Strategic Director of People that that the current contract with Sycamore should not be extended further. It has been the case since the failed procurement in 2020/21, that the service required redesign. Due to the impact of COVID and its effects on staffing capacity, this has been delayed. As a result, a

- service redesign was planned to be followed by a new commissioning exercise, which will commence imminently.
- 8. After formal notification, similar concerns were raised by service users of the Autism Hub regarding lack of interim support between the contract lapse and the recommissioning of a new all-age autism service.
- 9. Through the Equalities Impact Assessment, it is recognised that due to the timescales, there is a risk of a gap in service, impacting particularly on the wellbeing of current users of the service

Next steps

- 10. In view of the above, it was decided to signal the council's intention that the current contract be allowed to end with the provider given notice by no later than the end of October 2023. Between now and the end of the contracts determined end, there will be a review of similar services, which includes NELFT's expanded diagnostic pathways. To coincide with this review, it is proposed that the Council will consult with people with Autism, their families and communities to develop a needs assessment of current needs, providing us with an opportunity to map services across partner organisations with a view to establish gaps and avoid any duplication. It is our intention to use this information to help determine and shape a service that meets the future needs of our residents with Autism and their communities.
- 11. Prior to informing the current provider, Sycamore Trust, of the proposed decision communications were sent to key stakeholders in confidence including colleagues in North East London Integrated Care Board (NEL ICB), and the Autism Partnership Board. It is the case that there are concerns about the risk of potential service provision gaps that could be left by letting the contract lapse, which is understood by the Council.
- 12. To mitigate concerns raised by service users and identified through the Equalities Impact Assessment, it is now recommended that the current contract be extended for a further 6 months to enable the Council to engage with residents with Autism, their families and communities and review similar services with the intention of commissioning a new offer.

IMPLICATIONS AND RISKS

Financial implications and risks:

The lapsing of this contract is cost neutral to the council as it is intended to recommission an alternate service. A review and consultation will be undertaken with people with Autism, their families and communities which is intended to result in a new service provision being provided in the future.

Legal implications and risks:

The Council has duties under the Care Act 2014 to provide care and support to eligible individuals. It is understood that the services provided by the Autism Hub do not fall into the category of such care and support and therefore if there is a gap in provision of the type of services provided by the Autism Hub it should not result in a breach of statutory duties to any such individuals. However, if the contract is extended for 6 months then no such risks will apply.

The contract was due to come to an end in Jan 2024 and has been extended once already. A further six months' extension in the circumstances appears reasonable, given there is insufficient time for the review and re-procurement to complete before the current contract end date.

Human Resources implications and risks:

The recommendations made in this report do not give rise to any identifiable HR risks or implications that would affect either the Council or its workforce.

Equalities implications and risks:

An Equalities Impact and Health Assessment is attached as Appendix 1.

ENVIRONMENTAL AND CLIMATE CHANGE IMPLICATIONS AND RISKS

There are no Environmental and climate change implications and risks.

2. The EqHIA – How will the strategy, policy, plan, procedure and/or service impact on people?

Background/context:

Havering currently commissions the Sycamore Trust to deliver a preventative offer for adults with Autism and related conditions, within a budget of £80,000.00 per annum. The current contract ends on the 31st January 2024.

The Sycamore Trust has delivered this non-statutory contract since 2018. In 2021 a procurement exercise was completed but the procurement cycle failed due to no suitable bids being received. As a result of this an extension was given to the Sycamore Trust as an interim measure.

Background of the contract

The current contract provides peer support activities for adults with Autism and related conditions. This includes providing information and 1-1 outreach support for those socially isolated and raising awareness of Autism in the local community. The service is structured into a combination of advice/signposting and peer support groups which are run from a hub in central Romford and serve those between the ages of 18-30. The contract outcomes are to prevent and/or reduce demand for statutory services for Autism and other related conditions.

Current service aims are as follows:

- Provide a place for people with autism/learning disabilities to come for support, social interaction and to develop new skills
- Provide useful information advice on a range of issues affecting autistic people in Havering and act as a source of information on everything from employment to benefits
- To involve service users and carers in the design and planning of services
- To support users of the service to manage their autism/learning disability without the need/reduce the level of statutory support
- To support users of the service who are not in education employment or training to achieve positive economic outcomes
- To promote independent living and support self-management
- To raise awareness of adult autism within the broader community in order to ensure autism-friendly communities, employers and opportunities

Planning

The council sought to work with NHS partners to secure additional funding to expand the service to an all-age offering to coincide with our recently launched 'All Age Autism Strategy'. Currently Havering has a higher proportion of children aged 0-17 (22.3%) than 80% of local authorities in England and demand for autism related services for Children and parents has been in demand as a result. Unfortunately, after applying for several

funding applications, this has not been possible with the current budget pressures impacting Havering and our Health partners.

With the launch of the all-age strategy and the development and expansion of NELFT's ASD pathways earlier this year, the current service specification is no longer fit for purpose. NELFT currently offer pre-diagnosis support in the form of signposting and advice. Those awaiting assessment also have access to a monthly virtual pre-diagnostic group, a 5-week rolling programme covering various themes each month. They are planning to launch a post-diagnosis offer in January 2024, which coincides with the end of Sycamore Trust's contract. This offer will include user-led peer support groups, drop-in sessions and training to support service users, carers and parents to best support those with autism.

It is important to note that NELFT's business case for this service stipulates that the postdiagnostic offer will be available to those recently diagnosed with autism which excludes our existing autism community. However, there are a number of peer support and social inclusion groups available in Havering that are inclusive and are able to support this cohort such as:

- Havering Association for Disabilities (HAD)
- Bridge of Friends Group
- Romford Autistic Group (RAGS)
- Havering MIND

In addition to these similar services being on offer, we are also aware that there is a demand for support for parents of children with autism and peer support for those over 30, which is not included within the service offer.

There have also been some service delivery-related issues with the current contract, i.e. low numbers of new referrals vs. what is coming through the diagnostic pathways and a large spend of the contract value on rental costs.

Although the initial decision to let the contract lapse at its end date of 31st January was made in October, it is clear from correspondence with the community that a further detailed review of services needs to take place alongside a period of engagement. It is the Council's intention to use this information to help determine and shape a service that meets the current needs of our autistic community and align with the priorities in the All Age Autism Strategy. In the interest of ensuring continuity of service, it is recommended that the contract is extended for a period of 6 months to carry out this work.

Who will be affected by the activity?

The proposal to extend the contract that provides peer support and social inclusion through the Autism Hub at its end date does not have the potential to affect and impact our autistic community due to ensuring continuity of the service.

Our autistic community

It is important to note that the way in which people with autism manage their lives differs from person to person, therefore it would be unrealistic to expect that any Borough would know the exact figures of those on the spectrum. Some people on the autism spectrum do not wish it to be known that they have autism; others consider that it impacts on them enough to seek out any specialist help or support; and others develop their own coping mechanisms to get through life.

Prevalence rates

The following table, from the Projecting Adult Needs and Service Information System (PANSI) indicates the predicted numbers of adults aged 18+ who have autism in Havering and indicates an expected increase in numbers in coming years; (this table includes people with learning disability).

	2020	2025	2030	2035
People aged 18-24 predicted to have autistic spectrum disorders	195	193	219	231
People aged 25-34 predicted to have autistic spectrum disorders	351	344	328	338
People aged 35-44 predicted to have autistic spectrum disorders	343	385	390	379
People aged 45-54 predicted to have autistic spectrum disorders	321	323	357	389
People aged 55-64 predicted to have autistic spectrum disorders	309	316	310	316
People aged 65-74 predicted to have autistic spectrum disorders	227	234	260	271
People aged 75 and over predicted to have autistic spectrum disorders	192	217	229	252
Total population aged 18 +	1,938	2,012	2,093	2,176

These prevalence rates indicate a current average of 1,982 adults with Autism in Havering.

Current service provision in Havering

The following tables provide data for those service users that use the Autism Hub as well as the numbers currently coming through NELFT's diagnostic pathway. We also have access to prevalence rates (as above) to give us a better understanding as to the potential size of our residents with Autism both now and in the future.

Current service figures

Service	Dates	New Referrals	Total no. accessing the service
Sycamore Trust	October-December 2022	7	57
Sycamore Trust	January-March 2023	14	57
Sycamore Trust	April-June 2023	12	63

Current NELFT figures

Sarront NEEL 1 ngaroo		
Service	Dates	Referrals
NELFT Adults Autism		38 referrals and 94
Diagnostic Pathway	October-December 2022	assessment appointments
(Havering Data)		offered
NELFT Adults Autism		41 referrals and 115
Diagnostic Pathway	January-March 2023	assessment appointments
(Havering Data)		offered
NELFT Adults Autism		43 referrals and 98
Diagnostic Pathway	April-June 2023	appointments offered
(Havering Data)		

For the period April-June 2023, there has been a total of 63 residents that have received support from the Sycamore Trust and 141 Havering residents who have approached/offered an assessment via NELFT's ASD pathway. As of June 2023, there were 187 Havering adults awaiting an Autism Assessment.

Protected Characteristic - Age: Consider the full range of age groups		
Please tick (1 the relevant b		Overall impact:
Positive		Extending the contract that provides peer support and social inclusion through the Autism Hub will have a neutral impact on those aged
Neutral	✓	18+.Although when considered against all age groups it is assessed that it may have a negative impact on children under 18 as the current
Negative		service is commissioned for Adults only. As commissioned (for adults), overall it is assessed that the impact is neutral.

Evidence:

Of the service users referred between April –June 2023, 58% were aged between 18-25, 16% were aged between 26-34 and 25% were aged between 35-44.

The PANSI prevalence rates show that there are an estimated 1,982 autistic adults currently living in Havering with a minimum of 889 being between the ages of 18-44. Although it is not expected that every Adult with Autism would need support from the Autism Hub, current statistics show that they are currently supporting 3.1% of the autistic 18+ community.

It is important to note that currently Havering has a higher proportion of children aged 0-17 (22.3%) than 80% of local authorities in England. Demand for autism related services for Children and parents has been increasing and is not included within the current service offer.

Sources used:

- Provider's performance data

- Office for National Statistics (ONS), Census 2021

Protected Characteristic - Disability: Consider the full range of disabilities; including physical, mental, sensory, progressive conditions and learning difficulties. Also consider neurodivergent conditions e.g. dyslexia and autism.

Please tick (1)	Overall impact:
the relevant k	oox:	·
Positive		Extending the contract that provides peer support and social inclusion through the Autism Hub will have a neutral impact on the current users
Neutral	✓	due to ensuring continuity of the service.
Negative		

Evidence:

The Autism Hub targets support at those with autism or a learning disability who are either receiving no or little existing support. Of the service users referred between April –June 2023, 100% had a diagnosis of Autism and no other support needs were identified. Of the predicted number of adults with Autism, the Autism Hub is currently supporting 3.1%.

The needs of people with both learning disability and autism who meet Care Act eligibility criteria are met via the learning disability team. For other adults with autism, if they meet the current eligibility criteria for social care their needs may be met through one of the locality teams, the mental health teams or hospital based services.

For those autistic adults known to Adult Social Care in 2022/23, 196 have a recorded health condition of autism and 50 are receiving services. Those with additional needs are mostly likely to be known to Adult Social Care, in which 95 are in receipt of services for Autism and a learning disability.

Extending the contract will ensure that autistic Adults who do not fall under the Care Act or Mental Health eligibility will have access to peer support and social inclusion activities to support them in the community.

		Yes □ No ✓		

Evidence:

Of the service users who completed a survey between April – September 2023, 50% strongly agreed that they have had an improved quality of life, 62% strongly agreed that their social inclusion and social contact had increased and 31% strongly agreed that they are better able to manage their daily lives.

As identified in the tool below, the following areas are delivered as part of the current contract:

- Life skills
- Social contact
- Social support
- Participation in the community

- Membership of community groups
- Reputation of community

Extending the contract will ensure that autistic Adults will continue to be supported with their wellbeing through peer support and social inclusion activities with the aim of preventing statutory support.

4. Outcome of the Assessment

The EqHIA assessment is intended to be used as an improvement tool to make sure the activity maximises the positive impacts and eliminates or minimises the negative impacts. The possible outcomes of the assessment are listed below and what the next steps to take are:

Please tick (✓) what the overall outcome of your assessment was:

5. Action Plan

The real value of completing an EqHIA comes from identifying the actions that can be taken to eliminate/minimise **negative** impacts and enhance/optimise positive impacts. In this section you should list the specific actions that set out how you will mitigate or reduce any **negative** equality and/or health & wellbeing impacts, identified in this assessment. Please ensure that your action plan is: more than just a list of proposals and good intentions; if required, will amend the scope and direction of the change; sets ambitious yet achievable outcomes and timescales; and is clear about resource implications.

	Protected characteristic / health & wellbeing impact	Identified Negative or Positive impact	Recommended actions to mitigate Negative impact* or further promote Positive impact	Outcomes and monitoring**	Timescale	Lead officer
Page 23	Health and Wellbeing	Initial assessment Negative Now assessed as Positive due to the proposal to extend the contract	To ensure continuity of the service the contract be extended for another 6 months to carry out a detailed review of service and period of engagement with the intention to commission a new all age service offer.	Extend the service for 6 months from 1 st February 2024	6 months	Sophie Barron

Add further rows as necessary

^{*} You should include details of any future consultations and any actions to be undertaken to mitigate negative impacts.

^{**} Monitoring: You should state how the impact (positive or negative) will be monitored; what outcome measures will be used; the known (or likely) data source for outcome measurements; how regularly it will be monitored; and who will be monitoring it (if this is different from the lead officer).

6. Review

In this section you should identify how frequently the EqHIA will be reviewed; the date for next review; and who will be reviewing it.

Review:

This EqIA will updated as the service model is developed and recommissioned ahead of the proposed new contract end date of 31st July 2024.

Scheduled date of review: no later than April 2024 in readiness for the recommissioning exercise to begin.

Lead Officer conducting the review:

Sophie Barron (Commissioner and Project Manager, Commissioning Unit)
