

# HIGHWAYS ADVISORY COMMITTEE

8 November 2016

Subject Heading:	Appleton Way Area Review TPC621 – Formal consultation
CMT Lead:	Andrew Blake-Herbert
Report Author and contact details:	Stefan Cuff CPZ Engineer <u>schemes@havering.gov.uk</u>
Policy context:	Traffic & Parking Control
Financial summary:	The estimated cost of implementation is £6000 and will be met by the 2016/17 Capital Budget for Minor Traffic and Parking.

# The subject matter of this report deals with the following Council Objectives

Havering will be clean and its environment will be cared for	[x]
People will be safe, in their homes and in the community	[x]
Residents will be proud to live in Havering	[x]

SUMMARY

This report outlines the responses received to the informal stage 2 parking consultation of the Appleton Way Area controlled parking zone and recommends a further course of action.

#### Ward

Saint Andrews Ward

### RECOMMENDATIONS

- 1. That the Highways Advisory Committee having considered this report and the representations made recommends to the Cabinet Member for Environment Regulatory Services and Community Safety that;
- a) The area identified on the drawing entitled Appleton Way Area Proposed CPZ area contained in Appendix A be formally consulted for the introduction of a residents parking scheme and the introduction of pay and display parking in suitable locations.
- b) Following the formal consultation a further report detailing the representations received will be reported back to this Committee to agree a further course of action.
- **2.** That it be noted that the estimated cost of this scheme is £6000 which will be funded from the 2016/17 Capital budget for Minor Traffic and Parking

**REPORT DETAIL** 

#### 1.0 Background

- 1.1 This Committee agreed on 26 April 2016 to the informal stage 2 parking consultation of the proposed Appleton Way Area controlled parking zone.
- 1.2 An informal consultation was undertaken between 10 June 2016 and 4th July 2016, to gauge the views from the residents on the proposed CPZ area.

#### 2.0 Results of public consultation

- 2.1 From the 259 letters sent out to the proposed area 52 responses were received, a 20% return. Out of these responses the majority agreed that there was a problem with parking and were in favour of implementing the proposed CPZ area.
- 2.2 All of the responses are summarised, appended to this report as Appendix D

#### 3.0 Staff comments

3.1 It is clear from the responses to the consultation that there is longer term non-residential parking taking placing in the area, this is due to the close proximity to the local shops and businesses along High St and Station Lane.

#### IMPLICATIONS AND RISKS

#### Financial implications and risks:

The estimated cost of implementing the proposals, including physical measures, advertising and making the Traffic Management Orders costs is £6,000. These costs will be funded from the 2016/17 Capital budget for Minor Traffic and Parking.

The costs shown are an estimate of the full costs of the scheme, should it be implemented. A final decision would be made by the Lead Member – as regards to actual implementation and scheme detail. Therefore, final costs are subject to change.

This is a standard project for Street management and there is no expectation that the works cannot be contained within the cost estimate. There is an element of contingency built into the financial estimate. In the unlikely event of an overspend, the balance would need to be contained within the Street management overall Minor Parking Schemes revenue budget.

#### Related costs to the Permit Parking areas

Resident & Business permits charges						
Residents permit per year	1st permit £25.00, 2nd permit £50.00, 3rd permit and any thereafter £75.00					
Visitors permits	£1.25 per permit for up to 6 hours (sold in £12.50 books of 10 permits)					

#### Legal implications and risks:

The procedure to be followed by the Council in making Traffic Orders under Section 6 is set out in Schedule 9, Part III of the Road Traffic Regulation Act 1984 and the Local Authorities, Traffic Orders (Procedure) (England and Wales) Regulations 1996. This sets out, inter alia, a requirement to advertise the proposed Order in a local newspaper and if the Council considers it is desirable, to also display notices describing the proposed Order in the streets concerned.

#### Highways Advisory Committee, 8 November 2016

#### Human Resources implications and risks

It is anticipated that the enforcement activities required for these proposals can be met from within current staff resources

#### Equalities implications and risks

Parking restrictions have the potential to displace parking to adjacent areas, which may be detrimental to others. However, the Council has a general duty under the Equality Act 2010 to ensure that its highway network is accessible to all. Where infrastructure is provided or substantially upgraded, reasonable adjustments should be made to improve access. In considering the impacts and making improvements for people with protected characteristics (mainly, but not limited to disabled people, children, young people and older people), this will assist the Council in meeting its duty under the act.

There will be some physical and visual impact from the required signing and lining works.

Email: schemes@havering.gov.uk

Date: 7<sup>th</sup> June 2016

Dear Sir/ Madam

#### Appleton Way area parking review.

Following on from the "in-principle" consultation residents received in March 2015 and as agreed with the local Ward Councillors, I am writing to advise you that the Council are proposing to introduce a Controlled Parking Zone in the roads listed below and shown on the attached plan.

# Victor Gardens, Dorrington Gardens, Bruce Avenue (part), Woodfield Way, Sandown Avenue, The Avenue (part)

The aim of the introduction of a new Controlled Parking Zone is to increase the availability of parking for the residents of the area and to deter any parking that may cause a problem for the residents. As part of the new zone the council are also proposing to install double yellow lines around junctions to increase visibility and to allow safe passage of vehicles and pedestrians. If there are any existing restrictions on any roads within the zone these will be reviewed to see if they need to be changed to address any current parking issues you may be encountering.

I have attached a plan showing the proposed Controlled Parking Zone, a questionnaire is also attached that you are requested to complete and return to us by 4<sup>th</sup> July 2016. All responses received will be reported to The Highway Advisory Committee, who will then decide on a further course of action.

Yours faithfully

Stefan Cuff
