

CABINET

18 JANUARY 2017

Subject Heading:

Approval to launch the Joint Havering Carers Strategy 2017-2019

Cabinet Member:

Cllr Wendy Brice-Thompson

CMT Lead:

Barbara Nicholls Director of Adults and Health

Report Author and contact details:

Michelle Brown, Commissioning Manager for Carers and the Voluntary Sector, 01708 433113, michelle.brown@havering.gov.uk

Policy context:

Care Act compliance and best practice

Financial summary:

N/A

Is this a Key Decision?

Yes - Significant effect on two or more Wards

When should this matter be reviewed?

January 2018

Reviewing OSC:

Individuals Overview and Scrutiny Sub-Committee

The subject matter of this report deals with the following Council Objectives

Havering will be clean and its environment will be cared for
People will be safe, in their homes and in the community
Residents will be proud to live in Havering

SUMMARY

Approval is sought to publically launch the Joint Havering Carers Strategy 2017 to 2019, a joint public statement with the Havering Clinical Commissioning Group, on how the Council intends to develop support for carers of Havering residents.

This report summarises the Council's legal responsibilities to support carers, the key priorities for Havering and the outcomes which the Joint Havering Carers Strategy seeks to address.

It provides detail on the current levels of spend on supporting carers, the increasing pressures on carers and the actions we have started and will initiate to support carers.

RECOMMENDATIONS

That Cabinet approve the Joint Carers Strategy 2017-19.

REPORT DETAIL

Background and Policy Context

According to the 2011 Census, 25,214 people, 11% of Havering's residents provide unpaid care, an increase from 23,253 in 2001.

Carers undertake a significant amount of support to adults with social care needs. It is widely recognized that supporting carers to continue in their caring role reduces the cost of support for those they care for which would otherwise fall on health and social care services, saving up to £119 billion per year nationally.

The role of carers has been increasingly recognised in legislation. The Carers (Recognition and Services) Act 1995 established the right of carers who provided substantial care on a regular basis to request an assessment of their ability to care. The Carers (Equal Opportunities) Act 2004, which came into effect in April 2005, built on legislation by placing a duty on Councils to inform carers of their right to request an assessment and to take into account their wishes regarding employment, leisure and life-long learning.

The Care Act 2014, much of which came into effect from 1st April 2015, replaces all previous legislation relating to adult social care including carers. It also includes new rights for carers and how local authorities support them. Whilst previous legislation states carers must be providing "a substantial amount of care on a

Cabinet, 18 January 2017

regular basis” in order to qualify for an assessment, the Care Act gives local authorities a responsibility to assess a carer’s needs for support, where the carer appears to have such needs.

The Joint Havering Carers Strategy 2017 to 2019 has been developed by carers, jointly with Havering Council and the Havering Clinical Commissioning Group (CCG) and sets out our plans for the next three years.

The 8 outcomes identified by carers, that the Strategy proposes to focus on are:

1. Carers have access to information, advice and support
2. Carers feel less alone
3. Carers balance the caring role and have a life outside of caring responsibilities
4. Carers stay healthy
5. Carers get enough sleep
6. Carers manage stress and anxiety levels
7. Carers have the skills, tools and confidence to carry out caring responsibilities
8. Carers feel reassured about the health and well-being of the person(s) cared for, when carers are not with them.

Achievement of the above outcomes will support Havering carers to continue in their caring role and have a life of their own alongside their caring role, and ensure that Havering Council and partners are compliant with and promoting the principles of the Care Act.

The strategy does focus on Carers of adults aged 18 or over, however we do recognise young carers in the strategy and commit to working with relevant partners to identify and provide awareness of support to young people who have caring responsibilities, parents who are caring for children aged under 18, and young adults caring, and to support with the transition process into adulthood.

Safeguarding is also a key area in the Care Act 2014 and a priority for Havering Council and the Havering Clinical Commissioning Group. Our main emphasis is around making safeguarding personal and this is highlighted in the Strategy.

The Council is committed to raising awareness of how people who have any concerns about safeguarding issues or abuse, know how to speak to someone in confidence and/or raise an alert.

Budget and Demand

As stated above, according to the 2011 Census, 25,214 people, 11% of Havering’s residents, provide unpaid care, an increase from 23,253 in 2001. People take on caring responsibilities every day and it is recognised nationally that the number of

Cabinet, 18 January 2017

people with caring responsibilities is set to rise, with everyone having caring responsibilities at some point in their lives. Havering has one of the highest carer populations in London.

Current and future spend on carers includes:

- Carers personal budgets;
- Carers events provided by commissioned providers and by Havering Joint Commissioning Unit;
- Voluntary and Community Sector (VCS) commissioned services supporting carers including carers support groups;
- LBH officer time for commissioning and contract monitoring carers support;
- Social care assessors undertaking joint assessments and separate carers assessments;
- Statutory advocacy provision for clients who are carers;
- Respite, as part of the person(s) cared for care plan;
- Allocations for respite/carer outcomes within client (service user) direct payments.

Managing Demand and Budget

Financial investment for carers support ensures that Havering meets its' statutory obligations under the Care Act. It is also linked with the demand management strategy by supporting carers.. By maintaining their ability to provide care and support it will prevent demand on Adult Social Care.

The Council has identified carers wellbeing as a specific outcome that we require as part of the re-commissioning of the voluntary sector in 2017/18. This will mean approximately £200-£250k ear marked for services that directly support carers. Further investment of approximately £400k - £600k will provide indirect support to carers through services that provide information and advice, initiatives to reduce social isolation and the development of peer support networks.

Stakeholder Engagement

Carers of Havering residents have informed the final Joint Havering Carers Strategy through a period of consultation and engagement, spanning over a year, including through:

- Carers consultation events
- Carer workshops with Adult Social Care staff
- Carers and the Care Act presentations to carers and discussions thereafter
- Carer workshops with independent facilitators
- Meetings with Community and Voluntary partners funded by Havering Council and the Havering Clinical Commissioning Group
- Carers individually and group discussions
- Dedicated carers focus groups and events for people caring for people with specific needs
- Survey of Adult Carers in England 2014-15 and the responses from carers of Havering residents

Cabinet, 18 January 2017

- Havering Carers survey 2015 in relation to GP support for carers
- Havering Carers Week event and 'the Big Idea'
- Quarterly Havering Carers Forum meetings
- Dedicated work with an independent external agency, FutureGov, who engaged directly with carers around their experiences and with providers of services for carers.

A further 3 month consultation was undertaken from June 2016 to September 2016, with a range of stakeholders, including carers of Havering residents, voluntary and community sector partners and public forums.

Comparator Information

The Council continues to consult with neighbouring boroughs to discuss the support and services provided to carers. London Carers Leads Network meetings take place regularly at London Councils which provides us with the opportunity to benchmark and collaborate in relation to carers support, with colleagues across London. There is no statutory duty to implement a Carers Strategy, however we are unaware of any local authority that has not published or is not in the process of publishing their local plans to support carers.

REASONS AND OPTIONS

Reasons for the decision:

The Strategy serves to demonstrate Havering Council and the Havering Clinical Commissioning Group's continued commitment to carers and aims to develop and co-ordinate multi-agencies working together to support carers and ensure that carers are treated as expert partners in care.

By not implementing a Joint Havering Carers Strategy, we would be without a written statement and action plan to guide us to proactively recognise and support carers. For the second consecutive year, we have a Better Care Fund scheme on Carers and the Voluntary Sector. The Joint Havering Carers Strategy is a commitment within the Better Care Fund scheme action plan on carers.

IMPLICATIONS AND RISKS

Financial implications and risks:

The spend on carers ensures Havering meets its statutory obligations and is also linked with the demand management strategy, in that if carers are supported to continue in their caring roles and to maintain or improve their wellbeing, they are able to continue to provide care and support for Havering clients who may otherwise be eligible for statutory care and support from Adult Social Care. We are also seeking to prevent the carers' own need for care and support, to ensure that carers are themselves supported to access training, work and recreation opportunities and able to manage their caring responsibilities with no or minimal impact on their health and wellbeing.

Legal implications and risks:

Local authorities have additional duties for carers under the Care Act 2014 as carers have the same legal rights as those for whom they care; the Care Act puts carers on an equal legal footing:

- Local authorities have a duty to assess carers who appear to have eligible needs
- Local authorities must consider a carer's overall wellbeing, which includes physical, mental and emotional well-being, participation in work, education and training, and social and economic well-being
- Carers who meet eligibility criteria will have a right to support to meet their eligible needs
- Carers should be supported to retain and gain employment
- Carers will have new rights to be consulted on the cared for person
- Local authorities will have a duty to provide information and advice relating to training, coping with routing caring responsibilities, managing in the workplace, knowing where to go for local support and services, benefits and finance, and information on assistive technology

In conjunction with the above, adults-focused Care Act, sections 96 and 97 of the Children and Families Act 2014 seeks to make sure young and parent carers get the support they need. Under this Act, local authorities are expected to try and identify young carers so they can be offered support and both adult and children's social services will need to work together on helping young carers.

Young people turning 18 and their carers may also become entitled to adult social care services; there is therefore cross over between the two acts in respect of the provision of support to young people between 18 and 25. The needs of carers,

Cabinet, 18 January 2017

reflective of the changed circumstances of the young person as they move towards adulthood, should also be considered as part of transition planning.

This Strategy sets out how we will respond to these new requirements for both carers and young carers from April 2016.

Human Resources implications and risks:

The recommendations made in this report do not give rise to any identifiable HR risks or implications that would affect either the Council or its workforce.

Equalities implications and risks:

The Outcomes stated in the Strategy will enable positive outcomes for those persons being cared for and for current or potential carers. The Equality Impact Assessment that has been undertaken alongside this Strategy details the positive impacts across all protected characteristics.
