<td>Social; community; crime; family</td>
</tr>
</tbody>
</table>

From the responses to this question it is clear that the impact would be felt most amongst local residents who value the ability to walk to the pool for either their own leisure or for their children’s swimming lessons.

*Further analysis of responses to this question by location and activity type can be undertaken if required.*
Q. The Council is facing a difficult decision. If you have any suggestions about how community leisure provision could be maintained in the area, please provide your comments below.

The majority of responses to this question related to perceived disparity of investment in the area local to Chafford sports complex, suggesting other areas of Havering are better funded and have access to superior facilities.
Responses from females (69%) were much higher than the Havering average of 52%, and responses from male residents (28%) were lower than the Havering average (48%).

91 respondents did not answer this question.
The highest number of responses (27%) were received from the 35 to 44 year old age group. This is significantly higher than the Havering average. 94 respondents did not answer this question.
Equalities analysis – disability

13% of respondents to the Chafford consultation considered themselves to have a disability, impairment or health condition. This is compared to 19% Havering average for working-age residents*.
