

Hello councillor

I will ask that the matter be added to the next meeting of the committee as a councillor call for action detailing the information below

Andy

**Subject:** install CCTV cameras at the Bridge Road/Lansom Road roundabout, Rainham.

Dear Andrew,

The IRG raised a motion at council, see below, but withdrew it to progress the Administration amendment of raising the matter at committee. You advised the Environment committee would be the relevant committee. Therefore I would like an item added to the next Environment committee agenda on 8<sup>th</sup> Sept about installing CCTV cameras at the Bridge Road/Lansom Road roundabout, Rainham, as per the Administration amendment.

**Please can this be arranged.**

Regards

B. CCTV CAMERAS – RAINHAM VILLAGE Motion on behalf of the Independent Residents' Group

The new Havering Local Plan seeks to strengthen the protection of our Conservation Areas and the Executive are promoting investments in the Rainham area, including a new swimming pool and leisure centre in Rainham Village. In view of this our Council calls upon the Executive to install CCTV cameras at the Bridge Road junctions to safeguard the Rainham Village Conservation Area and London Bid area and protect these investments and to deter Wennington Road, Upminster Road South and Rainham Village constantly and increasingly being illegally used as a short cut for HGVs 40 ton muck lorries accessing Ferry Lane industrial area.

Amendment on behalf of the Conservative Group

The Council refers the issue of heavy good vehicles using prohibited roads within the South of Havering to the relevant Overview and Scrutiny Committee for an investigation, outlining issues faced and possible solutions.
