

CABINET

REPORT

15 August 2012

Subject Heading:

Commissioning of a local Healthwatch service

Cabinet Member:

Councillor Steven Kelly, Lead Member for Individuals and Deputy Leader

CMT Lead:

Lorna Payne, Group Director, Adults & Health

Report Author and contact details:

Lorna Payne, Group Director Adults and Health,

lorna.payne@havering.gov.uk

01708 432488

Policy context:

The Health and Social Care Act 2012 requires the commissioning of a local Healthwatch service which will replace the LINK (Local Involvement Network) with some additional functions.

Financial summary:

Indicative allocations for the different elements of the new service have been given for Havering for 2013/14. The funding is not expected to be confirmed until January 2013 but it has been announced that funding will not be ring fenced.

Is this a Key Decision?

Yes

Is this a Strategic Decision? Yes/No

Yes

When should this matter be reviewed?

12-18 months from April 2013 (April 2014 – September 2014)

Reviewing OSC:

Individuals and Health

The subject matter of this report deals with the following Council Objectives

Ensuring a clean, safe and green borough	X
Championing education and learning for all	□
Providing economic, social and cultural activity in thriving towns and villages	□
Valuing and enhancing the lives of our residents	X
Delivering high customer satisfaction and a stable council tax	X

SUMMARY

- 1.1. The Health and Social Care Act 2012 places a duty on the Council (all councils with Social Service responsibilities) to commission a fully operational Healthwatch by April 2013.
- 1.2. Healthwatch is to be the new local Health and Social Care consumer champion and watchdog and will be required to represent the views of local residents of all ages, advocating and influencing the delivery and commissioning of Health and Social Care services.
- 1.3. The local representative of Healthwatch will have a statutory role on the new Health and Wellbeing Board from April 2013, ensuring that the voices of patients, users and the wider public are heard, and that the vision and objectives of the Health and Wellbeing Strategy reflect the priorities of local people.
- 1.4. The Council is keen to embrace the opportunities offered by the reconfiguration of health services locally and has been working closely with the Clinical Commissioning Group (CCG) for Havering to develop an ambitious set of priorities targeted on improving outcomes for patients and carers locally. The Council is therefore particularly keen to commission a Healthwatch function that will champion the views of patients, users and carers and improve public health and wellbeing as these new priorities are pushed forward.
- 1.5. Healthwatch will replace LINK (Local Involvement Network) and will have additional responsibilities.
- 1.6. A consultation paper has been issued which covers the commissioning options facing the Council with regard to the new Healthwatch function as the Council needs to decide how it wishes to commission Healthwatch in order for it to be in place in Havering by March 2013. It puts forward three possible models, subject to the consultation and legacy analysis.

MODEL A - Havering Healthwatch evolving from either the current LINK steering group or the host organisation

MODEL B - Havering stand-alone organisation procured by Havering Council

MODEL C - Shared Healthwatch 'Hub and Spoke' model, with joint commissioning led by Barking and Dagenham but with added local specification reflecting local priorities.

- 1.7. The closing date for the 21 day consultation is Friday 17th August 2012.

RECOMMENDATIONS

2. Cabinet is asked to:
 - 2.1 Note the consultation on models for the commissioning of a local Healthwatch service.
 - 2.2 Confirm the inclusion of the Independent Complaints' Advisory Service in the function to be carried out by Healthwatch.
 - 2.3 Agree to delegate the consideration of consultation responses, the LINKs legacy analysis, consultation with the host organisation and current chair/vice chair of LINK and selection of the appropriate commissioning route to the Lead Member for Individuals and Deputy Leader.
 - 2.4 Note that further work will be undertaken to draw up the specification and proposed operating model for Healthwatch in Havering once the procurement route has been established.

REPORT DETAIL

3. BACKGROUND

- 3.1 The Health and Social Care Act 2012 represents a watershed for how health services will be commissioned in England and Wales. In line with the Government's Localism agenda, particularly its vision for the NHS of "no decision about me without me", local communities are to have more of a say in the provision and quality of local health services.
- 3.2 Local Authorities will have new responsibilities in public health and a statutory responsibility to lead Health and Wellbeing Boards. Havering's Health and Wellbeing Board has been set up, in shadow form, and its statutory responsibilities will come into effect from April 2013. This will include agreeing with Havering's Clinical Commissioning Group and other health and social care commissioners what the health priorities are of the local population, to inform commissioning plans.
- 3.3 The Health and Wellbeing Board will agree a Health and Wellbeing Strategy for the borough, informed by the Joint Strategic Needs Assessment, which provides commissioners with an analysis of the health and wellbeing issues affecting the population.
- 3.4 Under the new arrangements, it will be vital to ensure the appropriate community engagement mechanisms are in place to capture the opinions of the public, patients, users and carers, so that their experiences of the local

Cabinet, 15-August 2012

health and social care system can be heard, and acted upon, to improve local services.

- 3.5 Going forward, we will therefore need to ensure that the Joint Strategic Needs Assessment and Health and Wellbeing Strategy reflects the views of the local population. Healthwatch will be a key engagement mechanism to enable this to happen.
- 3.6 'Healthwatch England' is to be the new Health and Social Care consumer champion and watchdog at a national level and will advise the NHS Commissioning Board, English local authorities, Monitor and the Secretary of State. It will also have the power to recommend that action is taken by the Care Quality Commission (CQC) when there are concerns about health and social care services.
- 3.7 It is envisaged that local Healthwatch organisations will have a reporting line into Healthwatch England and will be able to report concerns about the quality of health care to Healthwatch England, which can then recommend that the CQC take action.
- 3.8 A representative from Havering's local Healthwatch will have a statutory seat on the Health and Wellbeing Board, which will ensure the views of patients, users and carers influence the commissioning (and decommissioning) of services and that the vision and objectives of the Health and Wellbeing Strategy remains relevant and reflects the priorities of local people.

4. HEALTHWATCH IN HAVERING

- 4.1 The Health and Social Care Act 2012 places a duty on the Council (all councils with Social Services responsibilities) to commission a fully operational Healthwatch by April 2013.
- 4.2 Healthwatch will replace LINK (Local Involvement Network), hosted locally by the Shaw Trust, as the main organisation responsible for the voice of local patients of health and social care services, and the voice of the wider community. Healthwatch will also bring in the NHS advocacy service, currently provided across London by POhWER. The PALS (Patient Advice and Liaison Service) currently provided by PCTs will also transfer, with its funding, to the Council and become the Independent Complaints Advisory Service. This can either also be provided by Healthwatch or be commissioned as a separate service. It is proposed that it will be included in the Healthwatch functions. Unlike LINK which had to be hosted, the new service will be directly commissioned.
- 4.3 Healthwatch will have broader remit than LINK with the additional functions of:
 - Advice and information about access to and choice of health and social care services

Cabinet, 15-August 2012

- An advocacy service for people wishing to make an NHS complaint
- 4.4 Additional funding is to be made available for these functions; however, it will not be substantial and is not to be ring fenced.
- 4.5 In summary, Healthwatch will have seven main functions:
- Gathering views and understanding the experiences of patients and the public
 - Making people's views known
 - Promoting and supporting the involvement of people in the commissioning and provision of local care services and how they are scrutinised
 - Recommending investigations or special review of services via Healthwatch England or directly to the Care Quality Commission (CQC)
 - Providing advice and information about access to services and support for making informed choices
 - Making the views and experiences of people known to Healthwatch England and providing a steer to help it carry out its role as national champion
 - NHS complaints advocacy
- 4.6 The Council's vision for our local Healthwatch organisation is that it will represent the voice of **all** Havering residents in the improvement of local health and care services. The chosen provider will need to ensure it has the appropriate engagement mechanisms in place to allow the wider population of Havering to have their voice heard, and make special provision for ensuring the voices of disabled people and those with long term illnesses, older people, vulnerable adults and children, as well as carers.
- 4.7 Healthwatch will be a vital way of monitoring the real impact of the Health and Wellbeing Strategy on improving the quality of local health and care services, and ensure that the Health and Wellbeing Board is able to hear and respond to those messages.
- 4.8 The Health and Well Being Board is currently preparing this strategy, in close working partnership with Havering Clinical Commissioning Group. The strategy is linked to a wide range of other Council strategies, such as those for vulnerable adults, safeguarding children and culture. So far, priorities for health and wellbeing improvements have been agreed in line with the evidence available from the Council's Joint Strategy Needs Assessment of local people's health and well being needs and the following themes have emerged:

Theme 1: Prevention, keeping people healthy, early identification, early intervention and improving wellbeing

Priority 1: Early help for vulnerable people to live independently for longer

Cabinet, 15-August 2012

Older and vulnerable people, especially those with long-term conditions, are the most intensive and costly users of health and social care services and there is a clear need for their experience and outcomes achieved to be improved. They account for half of all GP appointments, two thirds of all outpatient appointments and nearly three quarters of all inpatient bed days. As our older population continues to grow, we are faced with increasing demands on these services. By focusing on prevention and early intervention, we hope to relieve some of this pressure on services and enable more people to live independently and safely in their own homes for longer. We will:

- Help more vulnerable people, including those with long-term conditions and complex needs, maintain their independence in the community and reduce use of acute/complex services
- Tackle isolation and support vulnerable people to help maintain independent living
- Improve choice and control over the health and social care people receive
- Deliver more community based support, including volunteer-led services for people recently discharged from hospital and provision of reablement services to help them re-adjust to independent living.

Priority 2: Improved identification and support for people with dementia

Dementia is a clinical syndrome characterised by a widespread loss of cognitive function, including memory loss, language impairment, disorientation, change in personality, self neglect and behaviour that is out of character. It is an extremely distressing illness and a particularly pertinent issue for Havering due to our large, and growing, older population. We will:

- De-stigmatise dementia and ensure sufferers and their carers receive the best possible support in managing their condition
- Ensure high quality and accessible dementia information by improving data collection on the prevalence of dementia and data sharing between organisations
- Clinically train professionals to recognise the symptoms of dementia leading to earlier diagnosis and improved outcomes for sufferers and their carers
- Deliver more universal services and better quality of care for people with dementia.

Priority 3: Earlier detection of cancer

Cancer is a common disease, with about 1,200 people in Havering (one in every 200) diagnosed with some form of cancer each year. The cost of cancer care is high and national research has shown that more than 40% of cases are attributable to avoidable risk factors such as smoking, alcohol, poor diet and lack of exercise and could have been prevented if people lived more healthily. We will:

- Raise public awareness of the signs and symptoms of cancer, so that we can improve survival rates for those diagnosed with cancer
- Maintain excellent performance on waiting times between referral of patients with suspected cancer and first consultant contact

Cabinet, 15-August 2012

- Improve access to optimal treatment, particularly radiotherapy and surgery for Havering residents
- Maximise uptake of cancer screening
- Improve assessment and detection/suspicion of cancer in primary care settings
- Improve quality of cancer care services.

Priority 4: Tackling obesity

Being overweight or obese increases a person's risk of diabetes, cancer and cardiovascular disease. It can also restrict mobility and contribute to poorer mental health, which can limit a person's participation in their community and reduce their quality of life. Obesity is a complex issue that is affected by a range of behavioural, psychological, social, cultural and environmental factors. We will:

- Reduce obesity levels in adults and children
- Promote healthier lifestyles to maintain healthy weight
- Raise awareness of health risks associated with being overweight/obese.

Theme 2: Better integrated support for people most at risk

Priority 5: Better integrated care for the 'frail elderly' population

Havering's population is ageing and as a result the number of 'frail elderly' residents is increasing and placing huge pressure on our health and social care services. This very vulnerable group consumes a disproportionate amount of resources in terms of managing their care due to delays in hospital discharges, an overreliance on bed-based solutions and a high incidence of repeat hospital admissions. We will:

- Ensure with partners, seamless, integrated and efficient care pathways for 'frail elderly' people with care needs
- Improve pathways into and through community-based health services and general practice by working closely with the hospital and GPs
- Reduce the incidence and impact of falls leading to critical care/hospitalisation
- Enhance independence and capability of individuals to manage their circumstances/ conditions at home
- Improve outcomes and efficiency of care following injury as a result of a fall, including hip fracture
- Provide support to people within the community who have recently been discharged from hospital or who are at risk of admission/readmission
- Improve care in nursing and residential homes, including better management of demand to reduce avoidable hospital admissions
- Improve support to people not currently engaged with social care such as self funders and those with currently lower levels of need to ensure that greater opportunities to benefit from prevention, improved health and wellbeing and support are provided.

Priority 6: Better integrated care for vulnerable children

Cabinet, 15-August 2012

Healthy, happy and educated children are more likely to become healthy happy and productive adult members of society. Setbacks experienced in childhood as a result of troubled family backgrounds can result in long-lasting harm that persists throughout life and has a spiral effect leading to significantly reduced outcomes for those young people. Vulnerable children, such as those in care or with learning disabilities, face particular, more complex, issues and our priority is to support them to realise the same positive and sustainable outcomes as the rest of the population. We will:

- Provide intensive, bespoke, support to families with multiple complex needs to address their problems earlier
- Improve the stability of care placements and reduce placement breakdown, including reducing the number of placements between foster care and adoption
- Improve health outcomes for children and young people, particularly those in care
- Reduce teenage conceptions, terminations and improve sexual health through the delivery of targeted campaigns that raise awareness of health risks
- Commission universal and targeted access to health visitors and schools' nurses as a basic entitlement
- Provide access to high-quality therapies for vulnerable children and young people.

Priority 7: Reducing repeat hospital admissions

Hospital admissions, especially unplanned and repeat admissions, are extremely costly to the NHS and disrupt the lives of those affected and cause distress to family and friends and can cause increased dependency and ill health through such events as infections and length of stays that reduce people's confidence to manage at home. We are keen to reduce unnecessary hospital admissions, particularly for ill-health or injury that could have been avoided and repeat hospital admissions where individuals are admitted into hospital on a frequent basis. We will:

- Manage the care of patients proactively in the community through integrated case management
- Increase independence skills of people within the community who have recently been discharged from hospital or who are at risk of admission/readmission
- Reduce delayed transfers of care and seek greater collaborative approaches to ensure that planning for discharges can take place closer to an individual's point of admission
- Ensure informed choice on end of life care through robust information and guidance for patients and carers.

4.9 Delivering these strategic ambitions will be challenging and it will be vital that Havering has an effective Healthwatch with the skills and expertise to work with the Health and Well being Board to ensure that there is effective monitoring and engagement of patient and carer views whilst the Council and the CCG work with other health service providers to deliver these improved outcomes.

Cabinet, 15-August 2012

- 4.10 Some of the strategic outcomes set out above will mean close working with parts of the health economy that do not serve Havering alone, such as BHRUT. The Council is therefore working closely with the other local authorities that are also served by BHRUT and NELFT to ensure that we can jointly manage the improvements we would all like to see. For example, an Integrated Care Commission has been set up to establish how we can improve care for frail elderly people in the hospital, primary care and social care system. In addition, the three Clinical Commissioning Groups that serve Havering, Redbridge, and Barking and Dagenham Councils have decided to share a Chief Operating Officer and some back office functions. For these reasons, for each of the structures it is considering as part of the new health environment, the council is exploring whether we can share any services with either or both of our neighbouring boroughs. There is no commitment to do so at this stage, but there is an agreement to consider shared options as part of the Council's decision making. One of the options with regard to Healthwatch is therefore to share a Healthwatch with the London Borough of Barking and Dagenham who have expressed a wish to explore this option with Havering. Havering Council has not taken a decision on this option, but it is included in the consultation paper to gather any external views on this proposition prior to a decision on a commissioning route being determined.
- 4.11 The consultation paper (See appendix A) covers the functions of the local Healthwatch, funding, and possible commissioning strategies for Havering.
- 4.12 It puts forward three possible models:
- MODEL A - Havering Healthwatch evolving from either the current LINK steering group or the host organisation
- MODEL B - Havering stand-alone organisation procured by Havering Council
- MODEL C - Shared Healthwatch 'Hub and Spoke' model, with joint commissioning led by Barking and Dagenham but with added local specification reflecting local priorities
- 4.12 The attached paper (Appendix A) has been issued as part of a 21 day consultation, which will end on Friday 17th August 2012. Subject to the recommendation being approved, the responses will be reported to the Lead Member for Individuals and Deputy Leader for a decision on the arrangements for commissioning a local Healthwatch.
- 4.13 Following on from this consultation Local Authority will be carrying out a detailed analysis of the legacy of the LINK following a methodology supported by the LGA. The current host organisation, current chair and vice chair will also be consulted before planning the next steps to fulfil the requirement set out in National guidance to ensure Healthwatch benefits

fully from the foundation put in place by LINK Havering. Only then will the Council set out its detailed commissioning intentions for Healthwatch, including the form and shape of any future service to be developed.

- 4.14 The final operating model will take into account existing infrastructure that could support the success of Healthwatch locally to maximise its impact and profile. This could include support with premises, websites, customer insight information and marketing expertise.

REASONS AND OPTIONS

Reasons for the decision:

As previously explained, consultation is currently taking place on three options. The reasons for and against each of them are detailed in appendix A.

The timescales are short, but this needs to be balanced with the need for local people to influence the future shape of Healthwatch and ensure that the legacy of LINK forms a firm foundation to build upon. It is recommended to delegate the final decision on the arrangements for commissioning a local Healthwatch to the Lead Member for Individuals and Deputy Leader. This will allow the Lead Member to undertake further detailed work in relation to a detailed specification for future Healthwatch services.

IMPLICATIONS AND RISKS

Financial implications and risks:

Although the actual 2013/14 funding has still to be determined by central government, from April 2013 funding for Healthwatch will have two different elements:

- LINKs funding – DCLG Business Rates Retention Scheme (i.e. non ring-fenced part of the government funding provided to Havering to deliver all services)
- Additional Healthwatch funding – route still to be determined (Guide figure for Havering = £46,983)

In addition, there will be funding for the Independent Complaints Advocacy Service (Indicative grant allocation for Havering = £58,287)

Cabinet, 15-August 2012

In summary, in addition to the former LiNKs funding, the PALS/complaints functions are expected to transpose as additional budget of some £105k.

Funding for local Healthwatch will not be ring fenced as decisions on actual funding requirements are expected to be made by each local authority.

Legal implications and risks:

The Council has a duty to commission the functions previously the responsibility of the LiNKs and the Independent Complaint Advisory Service, but it has a degree of discretion in how it does so provided that the resulting Healthwatch is locally based. While there has been an assumption that the existing LiNK may form the basis of the new Healthwatch, it is not a forgone conclusion given the requirement to commission the work. There may be the need to consider the relevance of the limited EU procurement regime depending upon the exact format and length of the work commissioned.

Human Resources implications and risks:

There are no direct HR implications or risks for the Council that can be identified from the proposed actions in this report. The LiNK service is directly commissioned through a host organisation (Shaw Trust) and does not include any staff that are employed by the Council. The new local Healthwatch is to be commissioned from a social enterprise. The consultation paper refers to possible TUPE implications that may affect the current and new providers only. A dialogue with the host organisation needs to take place to progress this issue.

Equalities implications and risks:

An Equality Analysis and Impact has been produced. Based on the national EIA, it is unlikely the changes will have any effect on discrimination, harassment or victimisation nor are they expected to have a direct impact on particular equality groups.
