	Children and young people     Accident and Em	ergency Delivery Board	
	Mental health     Transforming Car	re Programme Board	
	Planned Care		

#### SUMMARY

Local authorities are required to revise their Covid-19 Outbreak Management Plans (OMPs), and to have submitted a first draft OMP to NHS Test and Trace by 12 March. OMPs should set out learning gained over the past 9 months, when local authorities published their first pandemic response plans in June 2020. The learning from revised plans is being collated to inform a refresh of the national Contain Framework (expected at the end of March 2021).

The Havering OMP version 2 takes into account additional tools and resources now at our disposal, and focuses on local action for interrupting transmission and suppressing infection. Aspects of the plan can be scaled up or down depending on future characteristics of the pandemic.

The aims of the plan are to

- prevent harms to the health of the local population caused by Covid-19, including any new variant of concern
- reduce secondary damaging effects to health and wellbeing as a result of restrictions on daily life which are required to halt transmission of infection
- address health inequalities caused by Covid-19
- be prepared for any changes in the characteristics of the pandemic, including future waves, and enduring transmission of infection

The first draft of the Havering OMP Version 2 has been submitted to NHS Test and Trace for consideration, and comments are awaited.

#### RECOMMENDATIONS

The Health and Wellbeing Board is recommended to consider and comment on the draft plan.

A further draft will then be developed by 31 March 2021, taking into account comments from Health and Wellbeing Board and NHS Test and Trace.

Once the Contain Framework is published, the Havering OMP will be re-checked to ensure it remains consistent with the national approach, and any final revisions made. The final version will be approved in accordance with the governance structure set out as an appendix.

#### **REPORT DETAIL**

No further detail

#### IMPLICATIONS AND RISKS

The OMP sets out the local response. Any decisions required as a result of implementation will follow appropriate decision-making processes.
