

Appendix 4:

Borough Contributions to the Joint LACW Minimum Recycling Performance and Borough /LES Aspirations for 2030

Borough	2030 LACW Minimum Performance	Borough / LES Aspiration
Barking & Dagenham	35%	50%
Havering	45%	50%
Newham	28%	50%
Redbridge	35%	50%
Joint Performance	35%	50%

Key assumptions in the modelling:
The loss of the recycling rate contribution (currently 5%) from the MBT's either at the end of the existing ELWA contract or before if reporting requirements change.
The increasing proportion of flats.
Prudent assumptions on the impact of EPR and DRS and that material captured by the DRS will be reported against individual local authority recycling rates.
That, in conformity with the Government's Consistency proposals and the LES Minimum Service Standards, the constituent Boroughs will add glass and a wider range of plastic containers to recycling services, as well as launching separate food waste collections.
The retention of the existing weekly residual waste collections for properties served at street level, and the existing garden waste charging and collection arrangements.
