

Havering Pension Fund Risk Register

September 2023

Generic Pension Fund Risk Register

The pension fund uses a 4 x 6 matrix to plot risk likelihood and impact and has set its risk appetite. The Risk Likelihood/Impact score shows in the column "Risk Likelihood/Impact Prior to controls" and the column "Risk Likelihood/Impact Post Controls". The green shaded area on the matrix shows the risks where there is good control and the Council is comfortable with the risk. Risks in the amber and red zones are those over which closer control is needed.
