

Evidence 5

Surrounding licensed premises

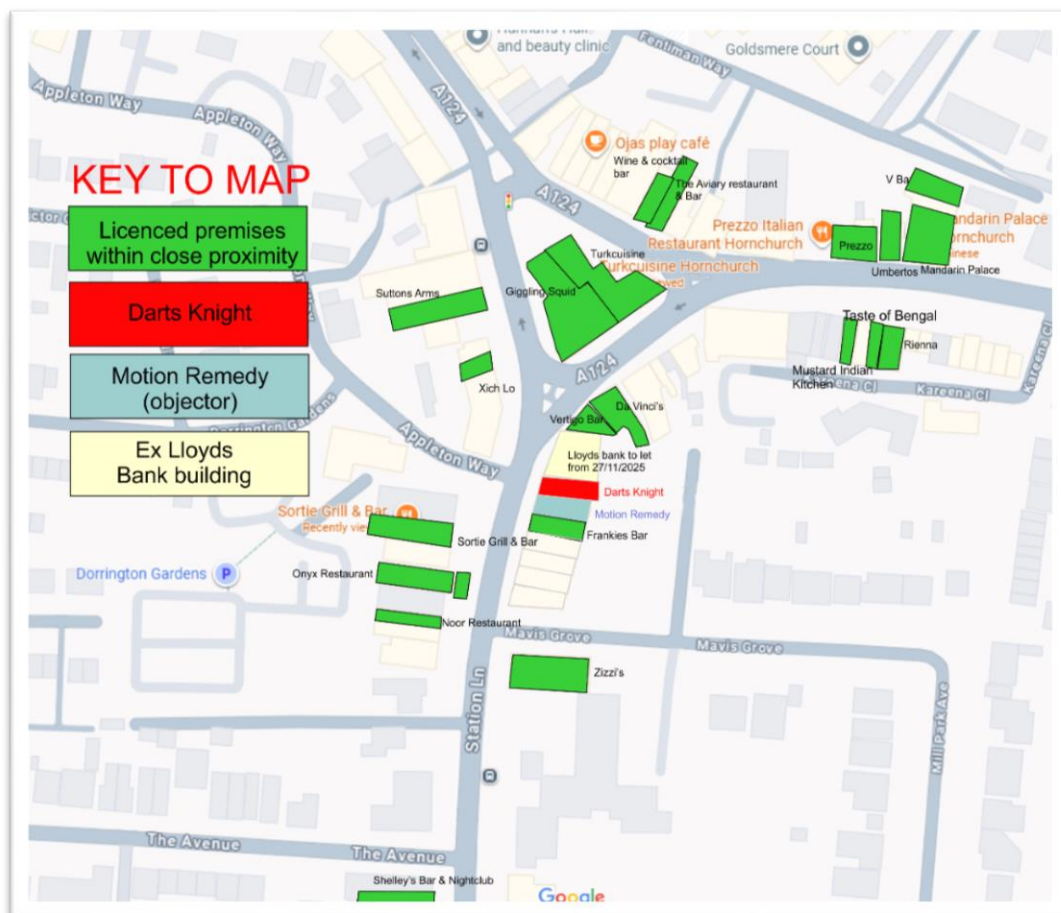

The emphasis of our business plan is on retail and playing darts in slots of 1 hour bookings. In general people will hire a lane for 1 or maybe 2 hours. Therefore their alcohol consumption in our premises is likely be limited to that time, focussing on play rather than drinking. There are numerous licenced establishments they can go to if their sole intention is drinking and partying.

Staff will be trained into recognising drunken behaviour and will emit them from the premises should they show signs of disruptive behaviour through excess drinking. CCTV recordings will be kept for 31 days and made available to local authorities and police.

A sign will be placed on the door to encourage customers to respect local neighbours by leaving quietly.

Music will only be played as background music

The following map shows the licensed premises within the immediate area

We are surrounded by licensed premises (shown in green within 150m of us) Also, due to it's large square footage and the current trend of High Streets, the Lloyds Bank building which is now empty and available to Let in November this year, is highly likely to gain interest from restaurants, clubs, bars etc requiring a license. If they were to be successful in their application and I am not, I would consider this very unfair.

I strongly feel that with the steps and policies I have put in place, I am confident that our premises will not bring any additional noise or disturbance to the area.
